ELECTROMAGNETIC FLOW METER SROAT -1000

INTRODUCTION :

The Manas Make electromagnetic flow meter called as SROAT-1000 virtually approaches the ideal flow meter suitable for wide range of liquid flow measurements even with very low conductivities. The meter offers no resistance to flow hence the pressure drop is almost negligible. The measurement being based on Faraday's law of electromagnetic induction, is independent of viscosity, density, pressure & temperature of flowing medium. The measurement is not affected by solid impurities as long as the min. conductivity of $5\mu\text{s}/\text{cm}$ is available. It is a true volumetric flow measurement. We offer various materials of construction for meter lining & electrodes to cover majority of corrosive liquids.

The technique called as " Pulsed DC " is used which offers very high zero stability & accuracy of measurement. The standard current output of 4-20 mA DC is provided which is linearly proportional to volumetric flow rate.

PRINCIPLE OF OPERATION :

The method of flow measurement is based on Faraday's law of electromagnetic induction. When a conductor moves within a magnetic field, voltage is induced in it which is proportional to the velocity of conductor.

In this case the conductor is flowing media. The equation is as below.

$$E = B.v.d.$$

where,

E = Induced voltage [proportional to velocity]

B = Magnetic flux density.

v = Mean velocity of the media

d = Distance between the sensing electrodes

For a given size of flow tube & compatible amplifier the flux density 'B' is constant, the distance between the electrodes is constant. Hence, the induced voltage is proportional to the velocity of the flowing media. Thus, the unit can be calibrated in terms of volumetric flow rate by knowing the cross-sectional area of the Tube.

PRINCIPAL ADVANTAGES :

1. Use of pulsed DC magnetisation & auto zero technique offers excellent long term zero stability.
2. Measurement is independent of velocity profile across the diameter of the pipe-line.
3. Measurement results are independent of density, viscosity, pressure, temperature, solid - impurities & conductivity variations [above $5\mu\text{s}/\text{cm}$].
4. No additional pressure drop across the meter which relieves the process designer while sizing his pumping requirements. Simple to install as no special precautions of straight pipe lengths required.
5. Compatible with virtually all corrosive / non-corrosive liquids.
6. Protection class offered IP 68 for flow sensor, IP 67 for transmitter.
7. Reasonably higher ratio of Return on Investment to Investment.

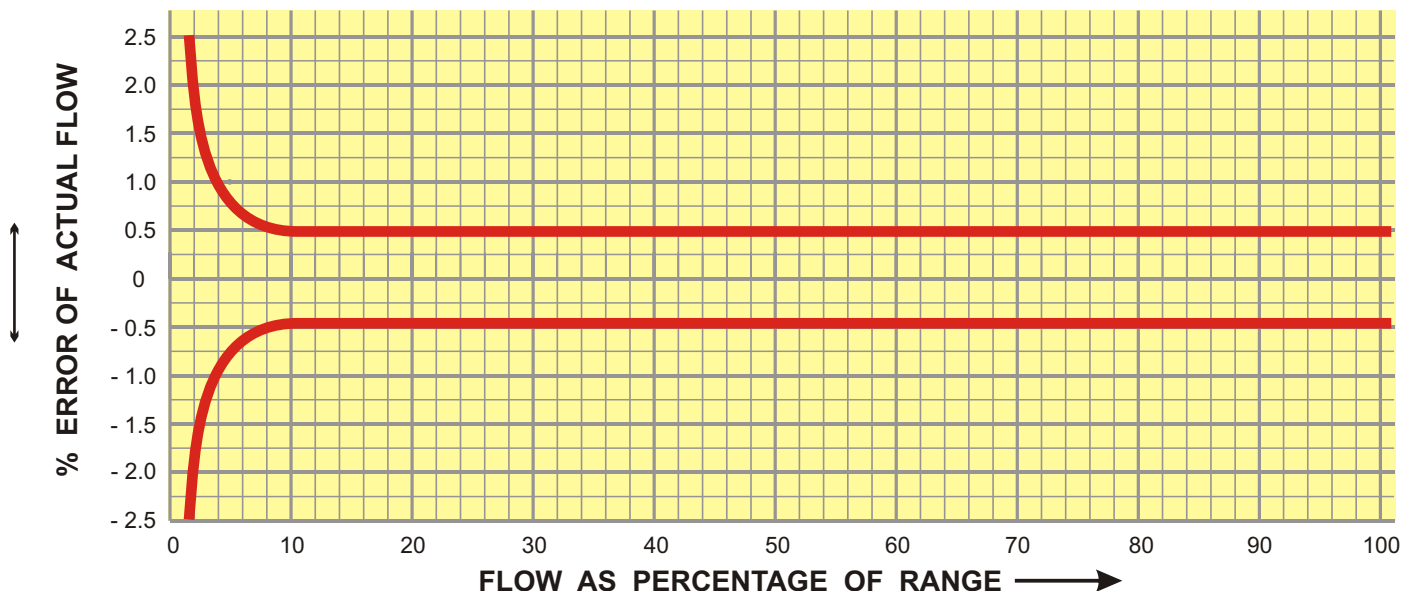

APPLICATIONS :

This meter is more suitable with those fluids which present difficulties in handling. Fluids such as effluents, slurries, pulps, brines & other highly corrosive liquids, acids & bases, fermenter-wash, molasses etc.

Following industries can find lot of application of this flow measurement technique.

- Effluent Treatment Plants
- Sewage Treatment Plants.
- Water Supply Schemes.
- Steel & Aluminium.
- Sugar Industries & Distilleries.
- Pulp & Paper.
- Chemical/Pharmaceutical.
- Petrochemicals/Fertilizers.
- Food & Drugs.

SPECIFICATIONS

METERING TUBE : SROAT 1000

- | | | | |
|--------------------------------|---|-------------------------|--|
| 1. Meter Size | : DN 10 to DN 350
for higher sizes consult factory | 4. Local Display | : a) 3 ½ digit LCD calibrated in % or in engineering units for flow rate indication
b) 8 digit LCD non resettable type for totalised quantity. |
| 2. Media Pressure | : Upto DN 80- PN 40
From DN 100 to DN 200 - PN 16
DN 250 to DN 350 - PN 10 | 5. Flow Velocity Range | : 0.1 m/s to 10 m/s |
| 3. Media Temperature | : PFA Liner : 0 - 200°C max.
PTFE Liner : 0 - 150°C max.
Rubber Liner : 0 - 90°C max. | 6. Accuracy | : ±0.5% of reading [at ref. conditions] between 100% to 10% of calibrated range
±0.75% of reading for flow rate between 10% to 5% [refer accuracy graph] |
| 4. Ambient Temperature Range | : 0 - 50°C | 7. Ref. Conditions | : Power supply nominal.
Temperature 27°C ± 2°C |
| 5. Materials : Pipe | : SS 304 [non-magnetic] | 8. Repeatability | : ±0.2% of reading |
| Electrode | : SS 316 / SS316L/Hastelloy C / Ta/Ti. | 9. Ambient Temperature | : 0 - 50°C |
| Liner | : PTFE / Neoprene /Soft Rubber / Hard Rubber/PFA. | 10. Temperature Drift | : ±0.015% per °C max. |
| Flanges | : Carbon Steel / SS 316 / SS 316 L / SS 304. | 11. Humidity | : 90 % R. H. max. non condensing |
| Body Material | : Carbon Steel, P. U.painted./ SS 304/ SS 316 | 12. Material of Housing | : Al. Die cast. |
| 6. Flange Standard | : ANSI / DIN /BS / SMS / Triclamp | 13. Power Supply | : 230 V ac/ 110 V ac, 50 Hz/24 V dc. |
| 7. Power Supply to field coils | : Pulsed DC | 14. Damping | : Adjustable from 5 to 30 Secs. |
| 8. Ingress Protection | : IP-68 | 15. Cable Entries | : 4 no. For Remote Amplifier
2 no. For Integral Amplifier
PG11/ ½" NPT / ½" BSP / [Female] |
| | | 16. Ingress Protection | : IP-67 |

TRANSMITTER SROAT 1000 A

- | | |
|----------------------------|--|
| 1. Mounting | : Integral mounted [standard]
Remote Mounted [on request] |
| 2. Min. Media Conductivity | : 5 µs /cm [for lower conductivities consult factory] |
| 3. Signal Output | : 4-20 mA dc isolated in max. 600 ohms |
| Additional option | : Pulsed Output With adjustable count rate from 1 count / Hr to 10 ⁵ Counts/Hr. [Open collector with 100 mA/24 V dc capacity] |

FLOW RATE TABLE : Flow rate at v = 1m/s

DN	M3/Hr.	LPM	LPS	DN	M3/Hr.	LPM	LPS

Flow Nomograph

Meter Dimensions (mm)

DN(mm)	A	B	C	D	E
10, 15, 20	60	180	115	200	76
25, 32	80	197	150	200	96
40, 50	115	232	220	200	102
65, 80	122	239	233	200	102
100,125	170	287	330	250	132
150	180	297	350	300	172
200	235	352	460	350	207
250	290	407	570	400	242
300	335	452	660	500	292
350	355	467	690	550	292

Dimensions are with ANSI 150 Flanges, with terminal box.
(for other flange rating consult factory)
Dimension 'D' is without earthing rings.
Standard flanges ANSI 150 up to DN 150
Bs10, Table F : DN 200 & onwards.

ORDERING INFORMATION
