From the desk of MD

This year is a very special year for Manas, as we have completed 24 years of operation and have entered the Silver Jubilee year. We have expanded our factory, have executed large export orders in the last year, and are now ready for the expanding horizons of our business.

We are witnessing a growing interest of many foreign customers in our company and are geared up for it. This newsletter is a combination of celebrations for the past and preparations for the future.

I am sure you will find a lot of interesting information and useful tips in this newsletter. Do let us know your expectations from our newsletter – after all, it is for you. Send us your view at digimark@manasmicro.com

-Shrikant Sahasrabudhe
- Managing Director, Manas Microsystems Pvt. Ltd.

We would like to learn more about Manas flow meter performance at your factory if you're already a customer. Your story will appear in one of our next editions.

Entering Silver Jubilee Year

We are delighted to announce that Manas has entered the silver jubilee this year. Our customers' belief in us and their support has helped us reach this landmark. We will continue to bring new innovative products and services for your benefit and hope to continue this wonderful journey with your support. Manas Microsystems had recently arranged an Annual Day function to mark the beginning of Silver Jubilee year.

Customer-centricity, dedication, and conviction pays off

We went from a small player in the flow metering business to a major player in this sector, and we spared no effort to achieve our aim. We improved our technology to provide our customers with cutting-edge technology and extremely dependable products.

We also wanted to innovate and increase our product range. This was done with the focus on improving product performance, making products that last longer and give better accuracy. As a result of these efforts, today we receive around 60% of repeat orders from our loyal customers.

Unwavering support throughout your order cycle

We're continuously looking for innovative methods to provide better and more efficient services to our customers. With an ever-growing list of customers and several orders from the same consumers, we decided it would be a good idea to enhance the experience of such customers. Our customer service engineers are now in charge of delivering all necessary information and updates, starting with the initial inquiry and continuing through the order cycle and even afterward, for service support.

Employees Corner

Having members who have been with us for a long time is a huge benefit. Let us introduce Mr. Sandip Jamnik, our Quality Control “Super-Wiser” sharing his experience. Sandip joined Manas in 2000; just after 2 years of Manas foundation. There was no LinkedIn or any other job portal when he started. He saw an advertisement for a job opening in the local newspaper and submitted his résumé. He was chosen from a pool of 20 applicants based on his expertise. He was hired as a Quality Control Electronics Tester. These were the early days of QC (Quality Control) at Manas. Sandip worked very hard to ensure that every Manas product passes each test and gives accurate & reliable results. Today Manas is having a well-equipped Quality Assurance department & Sandip is one of the main contributors to it.

Sandip expresses his gratitude to our MD, Mr. Shrikant, for his unwavering support and confidence in him. He remembers one occasion concerning quality testing. One of the products that arrived at Manas was gold plated one & Sandip wanted to test if gold plating was indeed genuine. He approached Mr. Shrikant for permission to test and to his surprise, Mr. Shrikant granted it without hesitation. He was thinking that he would be told to ‘believe’ what is received and not waste time and money in such kind of testing. Sandip says "Bosses have to be like that."

We respect the dedication of sincere people like Sandip, who are pillars of our growth.
